Patch Panels
Network Switches
Wireless Access Points

Mesa Beverage Co. is the Sonoma and Marin County distributor for such brands as Miller, Coors, and many others. Established in 1988, Mesa Beverage employs 116 people and provides service to approximately 2,000 retail accounts.

MESA went out to bid for technology vendors to equip their new 122,000 sq ft distribution/office facility located near the Sonoma County Airport. After receiving bids from vendors representing Cisco (Voice/Data), Vodavi (Voice Only), and Avaya (Voice/Data), MESA choose Telisys with their ESI Voice solution and Custom Data Network.

Highlights of the voice configuration include SIP trunking, 15 voicemail messaging groups, and 90 virtual DID's for direct transfer to outside cell phones, with in-house voicemail backup.

Ballpark
Project Cost
\$75k – \$125k

Completed
June, 2009

The 12 wireless access points (WAP) seamlessly cover the entire facility plus the developed outside perimeter
