July, 2009**

Our Mission

**3220 Beard Road
Napa, CA 94558**

We are dedicated to creating a beautiful smile and an excellent bite for each of our patients in an enjoyable and positive atmosphere. This is done by utilizing state-of-the-art treatment methods, digital imaging and comprehensive sterilization protocol. At the same time, we honor each person who encounters our office by treating them with love and respect. With teamwork and a passion for excellence in all areas of our profession, we are committed to making your orthodontic experience a rewarding one.

This practice had been a long time user of Panasonic phone systems, with their newest system being installed less than one year before calling Telisys. The major complaint was the unsophisticated features of the Panasonic Voicemail, especially the lack of easy and comprehensive switching of greetings. The ESI CS50 was setup to allow 1 button selection (scrolling) of 5 different pre-recorded main greetings while the main message taking mailbox has 3 different greetings that are pre-selected by pressing a button (Grt1, Grt2, Grt3), on the receptionist phone.
