About Us (Website)

Based in Santa Rosa, California, **Nordby Construction is a privately held, full-service general contractor.** Founded in 1978, Nordby has worked with our clients toward a common goal--to better our community, improve the lives of our employees as well as our clientele, and prepare for future generations.

Our building expertise is in both new construction and renovation, and includes commercial, technological, hospitality, non-profit, winery, tenant improvements, and multi-unit residential facilities. As builders of quality projects for almost 30 years throughout Northern California and the adjoining

Western states, **we pride ourselves on delivering exceptional products and customer service.**

NORDBY was a tough sell because our ESI Model 600 was much less expensive than the Cisco solution that was recommended by NORDBY'S current network vendor. However, we convinced them that the ESI provided the better reliability of in-house digital phones and the convenience of outside IP phones that can be used at job sites that have high speed Internet access. Finally the ESI's fax server integration feature along with our ability to furnish and install the fax server cinched the deal.

**Completed
January, 2007**
