(16 Ports, 140 Hours)**

**Ballpark Cost
\$20K–\$50k**

**Completed
October, 2007**

About Us (Website)

TrueNorth Health Education and Fasting Center has operated its residential health education program in California since 1984. Our program educates participants on the benefits of healthy living and on the use of fasting as a tool to improve their diet and lifestyle. Like a compass, we help our participants chart the course toward optimum health. We call this direction TrueNorth.

Our goal is to create a peaceful environment in which our participants can learn to make positive changes to their diet and lifestyles.

We recognize that no two people are exactly alike.

The doctors can help you

tailor our program to meet your specific needs. Since 1984, more than 7,000 people have undergone fasting and successfully completed our residential health education program.

1551 Pacific Avenue
Santa Rosa CA, 95404

When TrueNorth solicited bids for the phone system for their new facility, they received bids from vendors representing Cisco, Avaya, Toshiba and ESI. Because of system flexibility and cost, the ESI solution presented by Telisys was chosen. In some ways, the TrueNorth phone application mimics that of a residential care facility with individual room phones that provide calling and voice messaging, while at the same time, allowing easy emergency calling to staff.
